88: 49887a Influence of zinc chloride complex with quinoline on the reaction rate of aniline with naphthalene-1,8-anhydride. Szadowski, Jerzy; Wojciechowski, Krzysztof (Inst. Dyes, Polytech. Univ., Lodz, Pol.). *Rocz. Chem.* 1977, 51(6), 1247-52 (Eng). The reaction of naphthalene-1,8-dicarboxylic

acid anhydride with PhNH_2 in presence of the $\text{ZnCl}_2 \cdot 2\text{-quinoline}$ complex gave I. The reaction followed the second order kinetics.
W. Gustowski
